## QUESTION 1

A screenshot of a web browser displaying a form titled "Customer's Details". The form is contained within a yellow-bordered box. It includes input fields for "Name", "Contact Number", and "Email". Below these are sections for "Order Details" and "Quantity". The "Order Details" section has a dropdown menu for "Rice" (currently showing "-Choose-") and a list of items: "Chicken Curry", "Mixed Vegetable", "Side Dishes", "Grilled Fish", "Condiment", "Mango Juice", and "Beverages", "Cendol". Each item has a corresponding input field for quantity. The "Delivery" section has a dropdown menu showing "-Please Select-". A "Submit Order" button is located at the bottom right of the form.

A screenshot of the same web browser displaying the "Customer's Details" form. In this state, the "Name" and "Contact Number" input fields are empty, and red text validation messages appear next to them: "required your name" for the name field and "required contact number" for the contact number field. The rest of the form, including the "Order Details" and "Quantity" sections, remains the same as in Figure 1.

Figure 2: Validation occurred when user left empty textbox on name and contact number.
